

EXP NO: 3

SETTING UP EPICS, FEATURES, AND USER STORIES FOR PROJECT PLANNING

AIM:-

To learn about how to create epics, user story, features, backlogs for your assigned project.

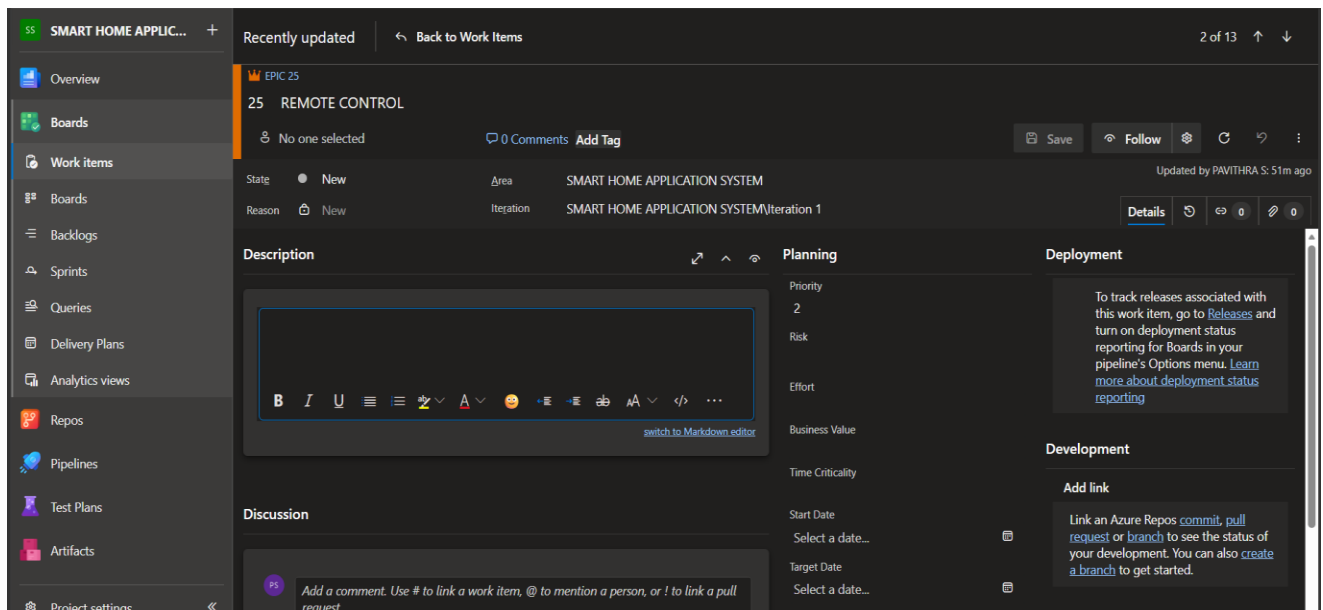

Create Epic, Features, User Stories, Task

The screenshot shows the Azure DevOps interface for a project named 'SMART HOME APPLICATION'. The 'Work items' section is active, displaying a list of items. The table below represents the data shown in the screenshot:

ID	Title	Assigned To	State	Area Path	Tags
26	ACCESS TO REMOTE	Unassigned	New	SMART HOME APPLICATION S...	
25	REMOTE CONTROL	Unassigned	New	SMART HOME APPLICATION S...	
24	Create UI for device control	Unassigned	New	SMART HOME APPLICATION S...	
20	Monitor Device	PAVITHRA S	Active	SMART HOME APPLICATION S...	
19	Schedule Device	PAVITHRA S	Active	SMART HOME APPLICATION S...	
18	Control Device	PAVITHRA S	Active	SMART HOME APPLICATION S...	

1.Fill in Epics

The screenshot shows the details of an epic titled 'REMOTE CONTROL' (ID 25) under the 'SMART HOME APPLICATION SYSTEM' area. The page includes a description field with a rich text editor, a planning section with fields for Priority, Risk, Effort, Business Value, Time Criticality, Start Date, and Target Date, and a deployment section with instructions on how to track releases. The description field is currently empty, and the planning section has default values for Priority (2) and Risk (Low).

2.Fill in Features

The screenshot shows the Azure DevOps interface for a project named 'SMART HOME APPLICATION SYSTEM'. The left sidebar contains navigation options: Overview, Boards, Work items, Backlogs, Sprints, Queries, Delivery Plans, Analytics views, Repos, Pipelines, Test Plans, and Artifacts. The main area displays a 'Feature' work item titled '26 ACCESS TO REMOTE'. The work item is in the 'New' state and is associated with the 'SMART HOME APPLICATION SYSTEM' area and 'Iteration 1'. The description field is empty, and the 'Discussion' section shows a comment prompt: 'Add a comment. Use # to link a work item, @ to mention a person, or ! to link a pull request.' The right sidebar contains sections for 'Planning' (Priority 2, Risk, Effort, Business Value, Time Criticality) and 'Deployment' (To track releases associated with this work item, go to Releases and turn on deployment status reporting for Boards in your pipeline's Options menu. Learn more about deployment status reporting). The 'Development' section includes an 'Add link' prompt: 'Link an Azure Repos commit, pull request or branch to see the status of your development. You can also create a branch to get started.'

3.Fill in User Story Details

The screenshot shows the Azure DevOps interface for a project named 'SMART HOME APPLICATION SYSTEM'. The left sidebar contains navigation options: Overview, Boards, Work items, Backlogs, Sprints, Queries, Delivery Plans, Analytics views, Repos, Pipelines, Test Plans, and Artifacts. The main area displays a 'User Story' work item titled '22 Support Multiple Devices'. The work item is in the 'New' state and is associated with the 'SMART HOME APPLICATION SYSTEM' area and 'Iteration 1'. The description field contains the text: 'System should handle multiple devices simultaneously.' The 'Acceptance Criteria' section lists two criteria: 'Supports 50+ devices' and 'No crash under load'. The 'Discussion' section shows a comment prompt: 'Add a comment. Use # to link a work item, @ to mention a person, or ! to link a pull request.' The right sidebar contains sections for 'Planning' (Story Points, Priority 2, Risk) and 'Deployment' (To track releases associated with this work item, go to Releases and turn on deployment status reporting for Boards in your pipeline's Options menu. Learn more about deployment status reporting). The 'Development' section includes an 'Add link' prompt: 'Link an Azure Repos commit, pull request or branch to see the status of your development. You can also create a branch to get started.'

RESULT:-

Thus, the creation of epics, features, user story and task has been created successfully.
